

MICHIGAN ENTERPRISES REPORT NUMBER EIGHTY—SIX
TO LINCOLN DDA

August 7, 2015

The following is a report by Bob Jones of Michigan Enterprises for the Lincoln DDA concerning projects which I worked on from July 10 – August 7, 2015:

1. ASSISTED LIVING PROJECT

Since the last meeting I have been scouring the Michigan senior living project, and came up with some more information. However, in the mean time I met with the Belle Oaks Assisted Living owner, Esther Nederhood and her manager, Mary Ann Meekhof. They informed me that they were ready to send their financial statements to Brock Johnson, who us the Devere Development Project Manager. They will be spending most of the day next Tuesday in the Lincoln and Alpena area and will be attending the DDA meeting

2. PROTON POWER – JET FUEL

The Proton Power investor people that I met with in Chicago recently are working on locating various sites to build their biomass to energy projects. I have been working with Don Nolan, who managed the Kaletta Jet Engine machine and repair shop in Oscoda. Kaletta now employs over 900 people. Don has volunteered Kaletta to be their jet fuel testing facility for Proton Power. They are helping to arrange for themselves and other jet bases to connect with Proton Power to use their jet fuel. More at the meeting
